Life Career - Clemens Anzmann

Personal Details

I love code and data and enjoy creating meaningful data visualisations for the web. I was born and raised in Aschaffenburg, later visited the bachelor course for multimedia in Ireland at the CIT and received my master degree in Media Direction at the Hochschule Darmstadt in Germany. My master thesis was on data sonfication in the workplace, which I wrote at the London data startup DataShaka. Now I'm working as a data visualisation engineer in London. When I'm not working with data, I enjoy making music and photography.
